

TELECOMPLUS
solutions without limits

Unmatched
Expertise and
Intelligence in Creative
IT infrastructures

20 Years of Experience

Building comprehensive cost effective networking solutions for customers with complex challenges.

Accelerated project definition and budgets
Streamlined integrated infrastructure design
Rapid mobilization and implementation
Seamless mechanization upgrades and automation

Reduced TCO
14 Key VAR relationships and DVBE discounts
Lower OpEx due to increased reliability

80 external partners
National scalable construction resources
National elastic maintenance resources

100 years aggregate network architecture design and implementation experience
25 years experience evolving and modernizing networks
Network function virtualization (NFV) planning
Software defined network (SDN) planning

100 power generating plant campus network upgrades
100 substations analog to digital telecom conversions
300 network support lab projects
3400 cellular and microwave site projects

We serve leading organizations throughout a broad range of industries with the most complex requirements.

- Telecom Providers
- Solar and Wind Campuses
- Power Generators and Distributors
- Enterprise Campuses
- Data Center Providers
- Public Sector Entities
- Network Support Labs
- Public Utility Operators
- Mobile Device Product Development Labs
- Petrochemical Campuses

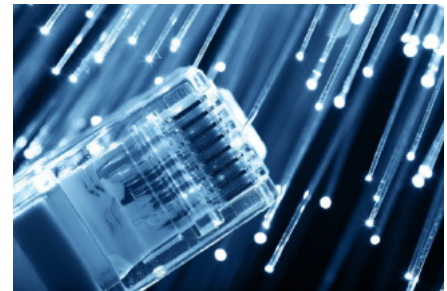

Microwave, 4G LTE, Radio, and Fiber

Design-Build services for new cell sites and copper to fiber conversion

Our Solutions

- Project management and engineering
- Special circuit service ordering, coordination, and turn-up
- Materials staging and scheduling
- Pre-bid & pre-construction coordination
- Construction management and site inspections
- Turnkey design-build for conduit, fiber, telecom equipment, RF equipment, AC and DC electrical for 4G fiber-fed sites and copper to fiber conversion including cutover for existing sites and Add/Mods
- EF&I custom EPO systems for current and legacy RF equipment including AC/DC electrical, grounding, and remote monitoring

Our Experience

3400

Wireless Site Installations
